

CUBEFRAME

The sound solution for your optics lab

- * Easy arrangement of the elements in your laboratory.
- * Tough free-standing aluminium frame provides easy access and stability to the workplace hardware without interfering with the vibration isolation of the optical table.
- * Shelves made of resin or 2 cm thick melamine-faced chipboard.
- * Custom-made according to the particular requirements of each laboratory.
- * Integrates instruments, computers and safety equipment with your optical table.
